

JavaScript Objects Practice Assignment

Topic: Non-Primitive Data Types — Objects & Arrays

20 QUESTIONS

Instructions for Students:

- Create JavaScript objects using literal notation (`let objectName = { ... };`).
- Each object must include 5 key-value pairs, where at least one key holds an **Array** value.
- Verify your objects in the console using `console.log(objectName)` and dot notation.

Q1. Employee Details

Create an Object named employee.

Keys: emp_name, designation, salary, department, contact_no, **skills** (Array: 3-4 skills)

Q2. Laptop Specifications

Create an Object named laptop.

Keys: brand, model, price, ram, isSSD, **ports** (Array: 3-4 ports)

Q3. Restaurant Menu Item

Create an Object named dish.

Keys: dish_name, category, price, isAvailable, **ingredients** (Array: 3-4 items)

Q4. Library Book Profile

Create an Object named book.

Keys: title, author, pages, publish_year, **genres** (Array: 3-4 genres)

Q5. Smart Phone Details

Create an Object named mobile.

Keys: brand, model, storage_GB, price, **colors_available** (Array: 3-4 colors)

Q6. Movie Profile

Create an Object named movie.

Keys: title, director, release_year, rating, **cast** (Array: 3-4 actors)

Q7. Shopping Product Details

Create an Object named product.

Keys: product_id, p_name, price, inStock, **available_sizes** (Array: 3-4 sizes)

Q8. Player Profile

Create an Object named player.

Keys: player_name, sport, age, country, **recent_scores** (Array: 3-4 scores)

Q9. Bank Account Profile

Create an Object named bank_account.

Keys: account_holder, account_no, balance, isActive, **recent_transactions** (Array: 3-4 amounts)

Q10. Course Details

Create an Object named course.

Keys: course_name, duration_months, fees, trainer_name, **topics_covered** (Array: 3-4 topics)

Q11. Car Profile

Create an Object named car.

Keys: brand, model_name, price, fuel_type, isElectric, **features** (Array: 3-4 features)

Q12. School Student Report

Create an Object named student_report.

Keys: roll_no, student_name, grade, attendance_percentage, **subject_marks** (Array: 3-4 marks)

Q13. Doctor Profile

Create an Object named doctor.

Keys: doctor_name, qualification, hospital_name, experience_years, **visiting_days** (Array: 3-4 days)

Q14. Music Track Details

Create an Object named song.

Keys: title, singer, album_name, duration_min, **languages** (Array: 3-4 languages)

Q15. Flight Ticket Info

Create an Object named flight.

Keys: flight_number, airline_name, ticket_price, isNonStop, **layover_cities** (Array: 3-4 cities)

Q16. Hotel Reservation

Create an Object named hotel.

Keys: hotel_name, city, rating, price_per_night, **amenities** (Array: 3-4 amenities)

Q17. Video Game Details

Create an Object named game.

Keys: game_title, developer, download_size_GB, isMultiplayer, **platforms** (Array: 3-4 platforms)

Q18. Smart Watch Specs

Create an Object named smartwatch.

Keys: brand, display_type, battery_life_days, isWaterproof, **sensors** (Array: 3-4 sensors)

Q19. Online Class Profile

Create an Object named online_class.

Keys: subject, batch_time, total_students, isLive, **study_materials** (Array: 3-4 topics)

Q20. Festival Details

Create an Object named festival.

Keys: festival_name, season, duration_days, isNationalHoliday, **famous_sweets** (Array: 3-4 sweets)

Example Structure (For Reference):

```
let example_object = {
  key_1: "Value 1",
  key_2: 100,
  key_3: true,
  array_key: ["Item 1", "Item 2", "Item 3"]
};
console.log(example_object);
console.log(example_object.array_key[0]);
```
